

Distribution Integrity Subject Matter Expert or Utility IT Project Manager

Opvantek, Inc., the industry leader in Distribution Integrity decision-support software for gas distribution operators, is seeking an Industry Subject Matter Expert or Project Manager with strong business and software implementation experience. Our widely-used Optimain® DS software product provides a powerful system for gas distribution operators to assess risk and manage distribution integrity, and is architected to fully support compliance with recently approved federal DIMP regulations. By the end of 2010, Optimain DS will be monitoring over 20% of U.S. distribution gas mains and this position is intended to support our rapidly growing customer base.

This position will be responsible for leading Opvantek's business analysis and software implementation projects, interacting directly with our customer's IT project managers and business subject matter experts, tracking and reporting project status, conducting regular customer status meetings, and assisting in requirements gathering and analysis. Candidates should have knowledge of natural gas distribution system assets from an operations and/or engineering perspective. Candidates are also expected to have an above average knowledge of common IT systems used by utilities for asset and work management. You must be capable of facilitating Opvantek development staff and customer teams through technical requirements analysis. Candidates must demonstrate strong project management and interpersonal coordination skills with the customer and internal Opvantek staff, including the use of Opvantek's project management tools and a Web-based system used to manage an agile software development process. As an energetic member of our team, you'll also be expected to contribute to sales support and proposal writing, software testing and training, documentation, and by attending and presenting at industry conferences.

Opvantek offers a competitive package of salary plus commission and benefits commensurate with experience. Extensive fully reimbursed travel required. Successful candidate(s) will likely be located near the Philadelphia metropolitan area but exceptions will be considered.

Interested candidates should browse our website at www.opvantek.com and submit resume and compensation requirements to HR@Opvantek.com
